1 What is the problem that you will be investigating? Why is it interesting?

2 What dataset(s) are you using? Is that sufficient?

3 What geometric/topological approach will you use/develop?

4 What are anticipated challenges of this project?

5 How will you evaluate your results?

5.1 Qualitatively, what kind of results do you expect (e.g. plots or figures)?

5.2 Quantitatively, what kind of analysis will you use to evaluate and/or compare your results (e.g. what performance metrics or statistical tests)?

5.3 Be concrete and specific
